Report overview

Survey's theoretical framework

What this is

The framework provides an overview of the workplace factors and outcomes that the survey measures.

Why this is important

Based on theory and research, the framework focuses on core themes that help guide organisations in creating better workplaces.

We developed the framework in consultation with stakeholders from the public sector and Deakin University.

Our public sector values

The public sector values inform the professional and ethical conduct of everyone who works in the public sector.

As such, these values underpin the theoretical framework of the survey.

There's a strong link between workplace culture and how staff perceive their organisation lives the public sector values.

Your comparator group

What this is

This is a list of similar organisations to yours.

We try to make sure they're in the same industry your organisation is in.

Some organisations may not have taken part in the survey previously. This means your comparator group may be different to previous years.

How we use this in your report

In this report, we compare your organisation's survey results to your comparator group's results.

This is so you can compare how your organisation is doing in your industry or to similar organisations.

We refer to your comparator group in this report as 'comparator'.

Report overview

Your response rate

What this is

This is how many staff in your organisation did the survey in 2024.

Why this is important

The higher the response rate, the more your results will reflect how staff feel.

If less than 100 completed the survey, consider how much one person could change your results.

For example, if only 25 people did the survey, 1 person would account for 4% of any result.

In this example, if your survey result and comparator group result or previous survey result are within 4% of each other, there is very little difference in the results.

How to read this

The number in the brackets () shows how many staff completed the survey this year.

Discrimination

What is this

Discrimination is when a person treats, or proposes to treat, a person unfavourably because of their personal characteristics, such as their age or gender, or other attributes.

Why this is important

Staff expect to have a safe and inclusive working environment to work in that is free of discrimination.

Why there is no data here

We've not published the results for this section because less than 10 people said they experienced discrimination.

We do this to protect the respondents.

People outcomes

Why this is important

Understanding how many people you have in each role helps you understand if you have the right balance of staff.

How to read this

Each demographic area shows the breakdown of responses from your survey results.

The (n) column shows the number of respondents in each category.

How we protect anonymity and privacy

- de-identify all survey response data provided to your organisation
- don't release employee experience results when fewer than 10 people in a demographic group have responded to the survey
- don't release employee experience results for demographic groups where organisations have fewer than 30 responses in total
